

THE GLOBE-REPUBLICAN.

The FORD CO. GLOBE, Established 1877.
The FORD CO. REPUBLICAN, " 1886. Consolidated, 1892.

DODGE CITY, KANSAS, THURSDAY, SEPTEMBER 27, 1900.

TWENTY-FOURTH YEAR. VOL. XXIII, NO. 51.

Stimulating Emigration.

The Rock Island has come to the relief of the organization which the Commercial Clubs of the various cities of Kansas have formed for the purpose of stimulating emigration into the state, and has put a low rate of fare in effect from all points in Kansas along the Rock Island line. The low rate of fare will make it possible for the people of the east to visit Kansas at a moderate sum, and will at the same time redound to the benefit of Kansas and her resources.

The Rock Island recently submitted a proposition to the Western Passenger Association proposing an extremely low round trip rate from points in Illinois to all points in Kansas on its line. The proposition was not agreed to by all the other lines and was therefore negated by the Passenger Association, whereupon Mr. Sebastian, general passenger agent of the Rock Island road, gave notice that the Rock Island would take independent action in the matter and would put into effect the cheap rate proposed. This rate is a blanket rate of \$15 from Chicago and \$12 from all stations southwest of Joliet on the Rock Island road to all stations in Kansas. Tickets will be sold at these low rates on October 2 and 18, and are good for twenty days stay in Kansas.

The rate is from \$3 to \$15 lower than the one way rate used for home-seekers' excursions. This gives the western portion of Kansas like Phillipsburg and Goodland, and Caldwell on the south, the same low rate as would be given to Topeka, and in long distances would make a rate of less than one cent per mile each way.

With the large passenger traffic at present being moved over the Kansas railroads, and the scarcity of every railroad of passenger equipment to carry the regular local business at the regular rate of three cents per mile, it must be appreciated that this is a most extraordinary offer on the part of the Rock Island to help the state, trusting for further development to recompense the company. It has been suggested that all Commercial Clubs and the people of Kansas individually issue invitations and secure as large a representation as possible of Illinois and eastern people to come to Kansas while these low rates are in force on the Rock Island.

Cellular Cosmogony.

Mrs. Lydia Gray, agent, is in the city, and has placed on our table a book on "cellular cosmogony, or the earth a concave sphere." The author of the book, Koresch, demonstrates by geodesy and universal gravity, that the earth is hollow—or concave—and not convex, as shown by the Copernican system. The Koreschian system maintains that the heavenly bodies move in orbits, revolving with the heavens in twenty-four hours. The author applies the scriptural teaching of the revolution and movement of "lights," in a stationary world. "Two great lights were made to rule the day and night," Gen. 1: 16-17. The revolution of the sun not the rotation of the earth, is the cause of light and darkness. That the sun, moon and stars are in motion, the Bible declares; a striking illustration being the stopping of the sun by Joshua.

In order to prove the earth's concavity Koresch realizes that the average mind is unable to comprehend the processes through which we perceive the objective world. He says for this reason, simple demonstrations were found necessary, and numerous experiments have been conducted at the instigation of the Founder of the System, in actual demonstration of the fact that the surface on which we live curves concavely at the ratio of about 8 inches to the mile, making the conclusion inevitable that the earth is a hollow sphere about 8003 miles in diameter.

Can it be true that we are living in a big bowl, in the hollow of God's hand as it were?

The Koreschian science furnishes a remarkable defence of Scriptural Science. Whether we are prepared to believe the teachings of this book or not, or whether we can reconcile it with our professed beliefs founded on the teachings of centuries, and proven by astronomical and other scientific methods, we must admit that the reading of the book will lead us to a profound thought on the universe and to comprehend the source of being and activity, until the structure and function of the universe are absolutely known, and that we may know God, and understand man's relation to him and to the universe. And that as Paul said "for the temple of God is holy; which temple ye are." Koresch narrows the universe down to conceivable limits, and makes a personal God possible.

The world is full of ologies and isms, and under all this array of enlightenment darkness can no longer sit at the threshold of human endeavor and progressive thought.

We will give \$10,000 for a case of Habitual Constipation or Biliousness that will not yield to the Gatlins Anti-Bilious Compound, the greatest liver regulator on the market. Large boxes 25 cts. For sale by all druggists.

Astronomical Entertainment.

The entertainment and lecture at the opera house last Thursday night, given under the direction of S. E. Buser, Superintendent of the Reading Room System of the Santa Fe railroad, and assisted by Prof. Bombgardt, who delivered the lecture, was as novel as it was interesting. The hall was well filled with interested auditors who were well pleased with the highly instructive entertainment.

Buser's orchestra opened the evening's entertainment with a rag-time selection, which was followed by a solo by Mrs. Bombgardt, wife of the lecturer. A waltz by the band was next on the program and was tastefully rendered.

Mr. Buser then introduced Prof. Bombgardt and the lecture began at about 9 o'clock.

With the aid of a light and magic lantern, Prof. Bombgardt projected photographs and drawings of the solar system upon a screen, to illustrate his lecture, which made his talk easily understood.

He first took our own satellite, the moon, as a starter, and pointed out some very interesting points. The sun was next taken up in his discourse and was followed by the planets, so-called fixed stars and comets. He exhibited a photograph of the heavens which had a time exposure of 15 minutes, and proved beyond a doubt that each and all the stars were traveling through space, and all the same direction, by the fiery lines which the picture showed. The lecture was both instructive and entertaining.

Mrs. Arment and Mrs. Du Bois next sang a duet, which was followed by more music by the orchestra.

Mr. Buser made several short talks which were highly characteristic of that gentleman and were much appreciated.

Mr. Buser and his company are making all the division points along the Santa Fe railroad and giving these entertainments and trying to encourage the employees of the system to patronize the reading rooms.

War Against Germs.

The management of the Rock Island railroad has declared war against germs. It has adopted plans for a campaign for the extermination of all disease-breeding microbes that might stake temporary claims on the various properties of the company, and it will lose no time in carrying out the plans. The deodorizer will be the weapon it will use and the ammunition—death-dealing disinfectants—will be fired into cars, offices, stations and shops. The war will be waged on all parts of the system and those who will direct the campaign declare that cessation of hostilities will not be ended until there is not a germ left to fly a flag of truce and the possibility of a microbe's nefarious operations is precluded. After much experimenting the management of the road has adopted a hermetically sealed and automatic and economically distributing disinfectant. It will be placed wherever germs are likely to lie in wait for the unsuspecting public. Special attention, it is said, will be paid to quarters set aside for emigrants.

This is what an official of the road has to say upon the subject:

"There will be no germs of disease or bad and offensive odors lurking around the Rock Island property after the plans are carried out. Railroad properties are hard to keep clean but we believe that our road will be the acme of hygienic cleanliness after a short time. A great deal of money will be spent in carrying out the plan.

Costless Man Is Vulgar.

From The Haberdasher.

Advising or sanctioning the abandonment of the coat is to give countenance to one of the worst of all bad American habits. To preserve the esthetic and the artistic in dress one must leave the units of our outer attire undisturbed. To separate them is to leave a man half dressed. The man in his shirt sleeves is always the common and vulgar man. You'll find his kind leaning against the public bars, expectorating in public conveyances, and smoking in forbidden places. We may not discard the coat and preserve the rules of propriety and estheticism in dress. There can be no comparison between the dress of man and woman.

"A woman's shirt waist is merely a form of bodice, and it is an integral part of the outer dress of a woman. A man's shirt is a distinctive garment and is not part of his overcoat. Aside from these objections we have the more serious one of appearance. It cannot be 'becomingly' carried out. There are not ten men in every thousand so built that they can go without suspenders. And unless the suspenders are to be banished there is no use in talking about abandoning the coat. In no decent society, decent company, or properly conducted hotels or theaters would a man be permitted to appear without his coat. The costless man must always be what he has always been, a common, vulgar, undisciplined being, who puts personal ideas of comfort above the ideas of seemingly conventionalities.

Bicycle and general repairing at the Novelty Works.

RAILROAD NEWS.

—Wheat shipments are lively.

—Thos. Kerns has resumed breaking.

—Conductor Joe Dillard is on extra run.

—Conductor Pope has returned from his visit.

—Conductor Heustis is back on 31 and 34.

—Many empty cattle cars are being moved west.

—D. J. Luster is back again from Colorado.

—Engineer Ben Williams is sick with malarial fever.

—The Santa Fe has established through trains to Galveston.

—Wm. Henry took the switch in place of A. V. Postou, who is sick.

—F. C. Hasbrouck, formerly foreman here, is now living in Chicago.

—Orren Cowley, caller, will spend a few days in Newton, after October 2d.

—The Santa Fe will store 12,000 tons of coal at La Junta for the winter. Ten thousand tons have already arrived, and it makes quite an imposing pile between the side tracks south of the coal chutes.—Tribune.

—Geo. R. Cochran, of Denver, who came to attend his brother's funeral, is employed in the planing mill of the Colorado Southern Railway. About three years ago Mr. Cochran was injured by jumping off a car, and was ten months unable to walk. He is in good health generally.

—The wife of a railroad man remarked the other day that back east the Santa Fe company has a new way of getting rid of old engineers. The plan now is to call them up to the captain's office to undergo a test for sight and hearing.—La Junta Tribune.

—J. H. Conrad, while wiping an engine in the round house, yesterday morning, slipped off a stepladder on which he was standing, and in the fall he struck upon his left arm, fracturing the bone just below the wrist, a very bad hurt. Dr. Claude McCarty attended to the injured man. On December 4th last, Mr. Conrad lost a finger while at work in the round house. He is 63 years of age.

Inquiries from Clayton, New Mexico, come in at this time, wanting information regarding the movement of the Rock Island railroad company in the proposed extension. Up to this time, we learn that the corps of surveyors have made several surveys between this point and Clayton, and toward the Pecos Valley railroad at Amarillo, Texas. We have authentic information that the road will be extended. Except the fact that there have been a few loads of ties shipped to this terminus and the work of the surveyors in the southwest country, there is no movement on the extension at present. It is the general opinion of all railroad men that the road will be extended within the next two years.—Liberal News.

The greatest invention in military science was the Gatlin gun and the greatest discovery in medical science is Gatlins' Anti-Bilious Compound, which actually cures habitual constipation. So it is not necessary to be continually taking medicine. A short treatment does the work. Ask your druggist for a free sample. For sale by all druggists.

Mrs. Lease Is for McKinley.

Mary Ellen Lease of Topeka, Kansas, who was a prominent figure at the Kansas City convention, and who has been noted as a stump speaker for the principle of 16 to 1 in former campaigns, affirmed her conversion to Republicanism Thursday night at the Palmer house.

It is thought that Mrs. Lease came to Chicago to confer with the national committee about taking the stump for McKinley, but this she neither affirmed nor denied.

"Yes, I will support McKinley," she said when questioned. "In this campaign I am forced to choose between the patriotism of the Republicans and the copperheadism of the Democrats; between the expansion of the Republic and the contraction of the Democrats. I supported 16 to 1 in 1892 and 1896, but God has settled that question during the last four years by causing great discoveries of gold. On the new issue I find myself in harmony with the Republicans and so will support McKinley."—Inter Ocean.

Does It Pay to Buy Cheap?

A cheap remedy for coughs and colds is all right, but you want something that will relieve and cure the most dangerous results of throat and lung troubles. What shall you do? Go to a warmer and more regular climate? Yes, if possible; if not possible for you, then in either case take the ONLY remedy that has been introduced in all civilized countries with success in severe throat and lung troubles, "Boschee's German Syrup." It not only heals and stimulates the tissues to destroy the germ disease, but allays inflammation, causes easy expectoration, gives a good night's rest, and cures the patient. Try one bottle. Recommended many years by all druggists in the world. For sale by Palace Drug Co.

DIED—Sunday night, at the residence of her son, R. B. Snyder, in Royal township, Mrs. Jane Snyder, age 80 years. Mrs. Snyder was born in Jefferson county, Tenn., Sept. 7, 1820. She was married to Daniel J. Snyder, August, 1836, and to this union eleven children were born, six of whom are still living, three in Missouri, and three here, J. M., D. W., and R. B. Snyder, of Royal township, Ford county. Mrs. Snyder came from Missouri with her sons, and settled in this county in 1885. Mrs. Snyder was converted and joined the M. E. church in her youth, and after an illness of 21 months she died in the faith of the Gospel. The funeral service was conducted by the Rev. D. McCormick, who delivered an impressive sermon on the occasion, to a large number of sorrowing relatives, friends and neighbors, who attended the funeral in sympathy of the bereaved and in respect to the memory of the deceased. The remains were laid to rest in the Ridenour cemetery. To the stricken relatives and friends the community offers condolences.

Mrs. Snyder's husband died in 1862. She was a woman highly respected by all who enjoyed her acquaintance. She was a faithful Christian all her life, and her friends and neighbors will greatly miss her, but the venerable woman has gone to meet in Heaven those who preceded her.

DIED—In this city, Sunday, at 4 p. m., after a lingering illness, of consumption, N. D. Cochran, age 45 years. The deceased was born in Iowa, and came to Ford county, in 1885. He was married to Mrs. Vina Kirk, in 1887. For several years Mr. Cochran was employed on the Santa Fe Railway, but for nearly four years he has been unable to work. The funeral took place Monday afternoon at the family residence, and the services were conducted by Rev. E. M. Carr, of the Christian church, who delivered a sermon which touched the sympathies of every one. The interment took place in Maple Grove cemetery. The deceased was an industrious man when in active life and was highly regarded by every one who knew him.

Mrs. Cochran, the wife of the deceased, desires to express her heartfelt thanks to the friends and neighbors who so kindly assisted her in the long trial of suffering of her husband, and who watched and cared for him during his long illness. She will always hold them in grateful remembrance.

DIED—At his home, five miles south of Spearville, Sunday evening, of typhoid fever, Will Lawrence, age 49 years. The deceased leaves a wife. He was a member of the A. O. U. W., and a cousin to Glenn H. Lawrence, of this city. William Augustus Lawrence was born in Green county, New York, Aug. 27, 1851. Mr. Lawrence came to Kansas in the year 1883. He united with the Presbyterian church at Spearville in 1890, and was a consistent member of such to the time of his demise. The funeral services were held on Tuesday, September 25, at the Presbyterian church, conducted by Rev. H. B. Johnson, his pastor, and was largely attended by many relatives and neighbors.

DIED—At Spearville, Kans., Sept. 21, Frances Kolley, nee Sabieh, age 74 years. Born in Wansan, Prussia, married in 1850, Anton Kolley, a soldier of the war of 1848-9, in which he served with such distinction as to deserve and receive the King's Medal. They emigrated to America in 1871—stopping first in Wisconsin and later in Kansas in 1877.

Her husband preceded her, and she leaves three sons and one daughter, Mrs. L. W. Eastman, Spearville, two sons, Anton and Alvah in Dodge City and one in Pueblo, Colo.

DIED—At Spearville, September 24, 1900, Mrs. Sarah Bushey, age 79 years. Mrs. Bushey was born in Blair county, Pa., April 30th, 1821. She was married to Michael Coffman in March, 1842. She leaves five sons and one sister to mourn their loss. Mrs. Bushey united with the Evangelical Lutheran church at an early age and was a faithful member of the church to the time of her death. Funeral services were held at the residence Sept. 26, conducted by Rev. H. B. Johnson. Many relatives and sympathizing friends were in attendance.

DIED—At his home in Ford township, Sunday night, of pneumonia, Harry Walker, age 27 years. The deceased leaves a wife and child. He is the son of V. A. Walker, postmaster at Ford. He is said to have been a fine and industrious young man, and his death is sincerely regretted.

L. H. Degering, of Wilburn, on Friday, received a message from his wife, who is visiting her father at Eugene, Oregon, stating that their ten months boy had died after a short illness, Thursday morning last. The news is a sad one to Mr. Degering, but he hopes to meet his child on the morning of the resurrection.

Royal Baking Powder

Absolutely Pure

No inferior or impure ingredients are used in Royal for the purpose of cheapening its cost; only the most highly refined and healthful.

Royal Baking Powder imparts that peculiar sweetness, flavor and delicacy noticed in the finest cake, biscuit, rolls, etc., which expert pastry cooks declare is unobtainable by the use of any other leavening agent.

Alum is used in making cheap baking powders. If you want to know the effect of alum upon the tender linings of the stomach, touch a piece to your tongue. You can raise biscuit with alum baking powder, but at what a cost to health!

ROYAL BAKING POWDER CO., 100 WILLIAM ST., NEW YORK.

Eleven persons are in jail.

You can buy one-half dozen glass tumblers for 20c. at the Racket and Novelty Store.

Miss Bertha Wright, a former resident of Meade, is here from Dodge visiting friends.—Meade News.

Sheriff Hale last night arrested Arthur Bropt, who is charged with stealing raisers of Pearl Trebilcock.

Mrs. Nancy Marrs left last night for Guthrie, Okl., to see her daughter, Mrs. William Tighman, who is dying.

The first plow used in Ford county was owned by Colonel Young, who brought it here in 1873. It is a 24 inch plow and was taken by John Riney to Adobe Walls, Texas, where it was used in the building of the walls. It is owned by Archie Keesch, who has placed it on exhibition at the City Hardware store. Six yoke of cattle pulled the big plow. It is quite a curiosity.

Notice to Nominating Conventions.

All certificates of nomination and nominating papers must be filed in this office at least 30 days before election in order to be placed on the official ballot.

S. P. REYNOLDS,
County Clerk.

ADVERTISED LETTER LIST.

The following letters remain unclaimed for week ending September 27, 1900.

Bender, Mrs. Mary, 2 Bogert, Bert
Goodman, Viola Hall, Root, M.
Looschen, Mrs. John Lovelace, Myrtle
Montgomery, Lantz Perry, David
Proome, Geo. E. Ward, J. R.
One cent will be charged for advertised letter delivered.

J. A. ARMENT, Postmaster.

will be received for a remedy that is equal to Dr. Caldwell's Syrup Pepsin. For particulars ask W. F. Pine.

Remember the Maine and Imperialism.

The Spaniard who pressed the button which closed the electric circuit that exploded the mine beneath the hull of the Maine, little dreamed of the consequences, and which have not yet ceased to flow from the dastardly act which in sending that magnificent warship to the bottom of the sea, hurled a majority of its crew into eternity. The reverberations of that explosion have not ceased for a moment since. Swiftly following the destruction of the Maine a whole Spanish squadron was sent to the bottom of the Bay of Manila and a still stronger and prouder fleet of that nation was left strewn along the shores of the Bay of Santiago. While the shot which sank the Maine has been followed by the roar of cannon, the continued shriek of bursting

shells and the crack of the army rifle, yet the yearl of the Antilles is free, Porto Rico is a part of the great American republic, and the echoes from the firing line in far away Luzon grow fainter and must soon cease. The exploding of that bomb beneath the hull of the Maine was never surpassed, for potential sequences. The battle cry "Remember the Maine" in being heard half round the world has freed the thousands of Porto Rico, and hundreds of thousands of Cuba and the millions of the Philippines.

And is the Maine to be forgotten, and all the Victories won and the prestige gained since to be relinquished, because of the hypocritical cry of "imperialism?" Were not Cuba, Porto Rico and the Archipelago all under imperial rule at the moment the Maine was blown up? Did not the American people stand by their government when imperialism was destroyed in these Spanish possessions? Wherefore, therefore, this wail of Aguinaldo's would-be-allies? It is all simply sound and fury, political rot, and partisan clap trap, all an insult to American patriotism and intelligence.—Wichita Eagle.

Thomas A. Edison, the great inventor of electrical appliances, is reported to be about ready to give to the world a method of generating electricity without machinery or chemicals. Certain metals are arranged so that when heated by a stove or oil burner the electric current is produced. It is stated that the device will be so cheap and effective and will produce electricity at so small a cost that it will be possible to greatly extend its uses. Engineers are aware that the steam engine gives power equal only to a small percentage of the energy developed by burning coal or other fuel. In converting steam power into electricity there is also much loss. The new Edison device saves these losses and delivers in electrical energy about 90 per cent of the force produced by combustion. If these claims shall be realized the near future should see most of the work of the world done by electricity, relegating steam to a place in history. Electricity on the farm for lighting and for power should then become common.

Question Answered.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers and grandmothers never thought of using anything else for Indigestion or Biliousness. Doctors were scarce, and they seldom heard of Appendicitis, Nervous Prostration or Heart failure, etc. They used August Flower to clean out the system and stop fermentation of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling "off" and had with headaches and other aches. You only need a few doses of green's August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. For sale by Palace Drug Co.
